Visualisation: Power BI (DAX, data modelling), Tableau, Matplotlib, Seaborn
Statistics: Descriptive statistics, hypothesis testing, A/B testing, regression basics
Tools: MySQL, PostgreSQL, Jupyter, Google Colab, Git, Google Sheets

PROJECTS

Retail Sales Dashboard | *SQL, Power BI, DAX*
Report: github.com/arunkumar-data/sales-dashboard

- Cleaned and modelled 1 lakh+ rows of sales data; built a Power BI dashboard showing revenue, margin and top products by region.
- Found that 3 product categories drove 58% of profit; recommended a regional stock plan for slow-moving items.

Customer Churn Analysis | *Python, Pandas, Seaborn, scikit-learn*
Notebook: kaggle.com/arunkumar/churn-analysis

- Analysed 7,000 telecom customers; identified contract type and tenure as the strongest churn drivers.
- Built a logistic regression model with 81% accuracy and a simple risk score for the retention team.

SQL Case Study: Food Delivery | *MySQL, window functions*
GitHub: github.com/arunkumar-data/food-sql

- Wrote 25 business queries (repeat customers, peak hours, delivery delays) using CTEs and window functions.
- Presented findings as a one-page summary with 3 clear recommendations.
